SAFETY SUPPORT BLOCKS

BLOX Safety Support blocks have been designed to stabilise heavy loads that have been lifted for service, access or repair. All BLOX Safety Supports are manufactured from a uniquely formulated compound consisting of recycled high-density polyethylene (HDPE) and Polyurethane to create a safer alternative to traditional timber blocks. Typically, individual pieces are referred to as “blocks” and the structure or stacks are commonly described as “cribs”.

The key features of our Australian Made Blox range include:

- ✓ Known working load limit (WLL) of 122kg/cm² and maximum block working capacity
- ✓ Tested under the guidance of AS1170.2.2002 and AS2498.3.1998
- ✓ Unique cup and cone interlocking profile provides maximum interlocking and safety
- ✓ Manufactured from a consistent formula of repurposed used plastics and polymers
- ✓ Hi visibility Orange on non load bearing surfaces
- ✓ Light weight
- ✓ 50 year warranty against splitting, rotting, absorption, termites and mould
- ✓ Controlled manufacturing process for consistent quality
- ✓ Splinter free
- ✓ Non-absorbent
- ✓ Will not catastrophically fail
- ✓ Resistant to fuel, oil and most chemicals
